My employment opportunities [1]

Sciensano connects, health, science and society

If you are curious, competent and driven, you match the profile of the candidates that we are looking for.

We regularly seek scientists (doctors, biologists, bio-engineers, etc.) and laboratory assistants. We are also looking for administrative experts in different areas: human resources, finance, accounting, maintenance, reception staff, IT specialists, technicians, etc.

We employ staff under permanent contracts.
Fixed term contracts are also offered (e.g. external financing, replacement contracts), sometimes within the framework of specific projects (e.g. doctorate scholarships). These opportunities are a chance to have a first foot in the door of Sciensano and to develop your expertise in a given area of public health.
We are also open to collaboration, so do not hesitate to suggest any new projects to us!
