

# WASTEWATER SURVEILLANCE OF COVID-19 AND FUTURE APPLICATION

Epidemiology of infectious diseases  
Epidemiology and public health (Sciensano)

Sciensano symposium - December 2022

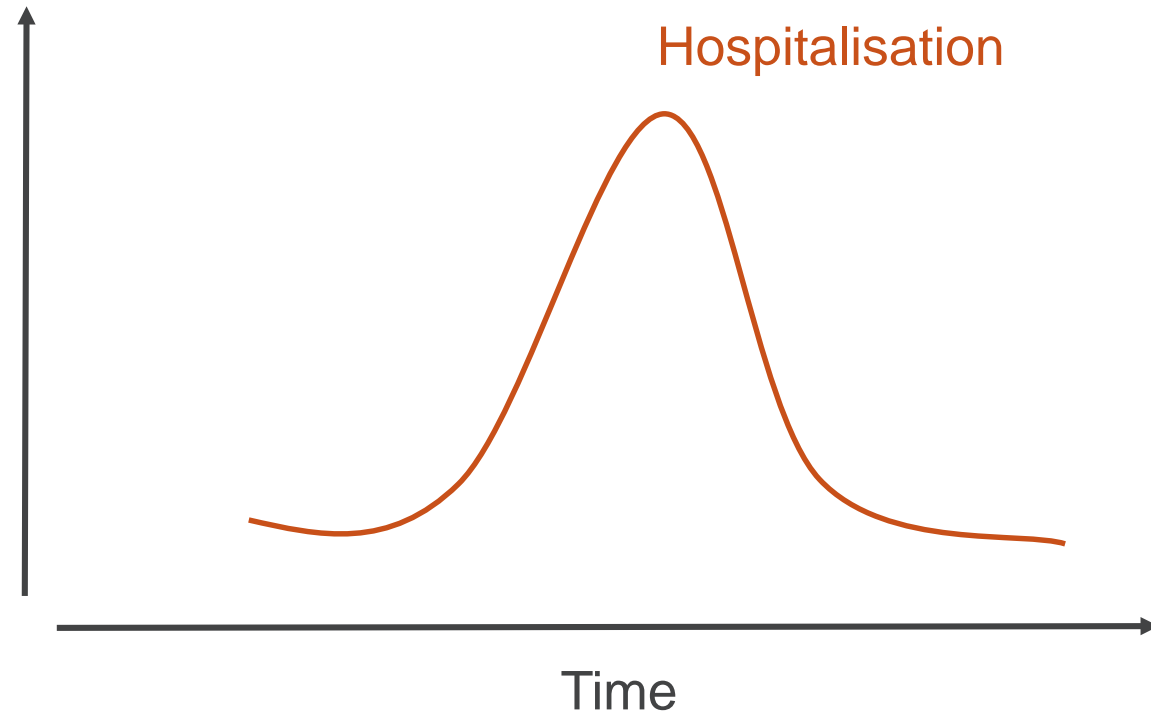

Have you ever had COVID-19 ?

Have you ever had COVID-19 ?

Did you use a toilet while being sick ?

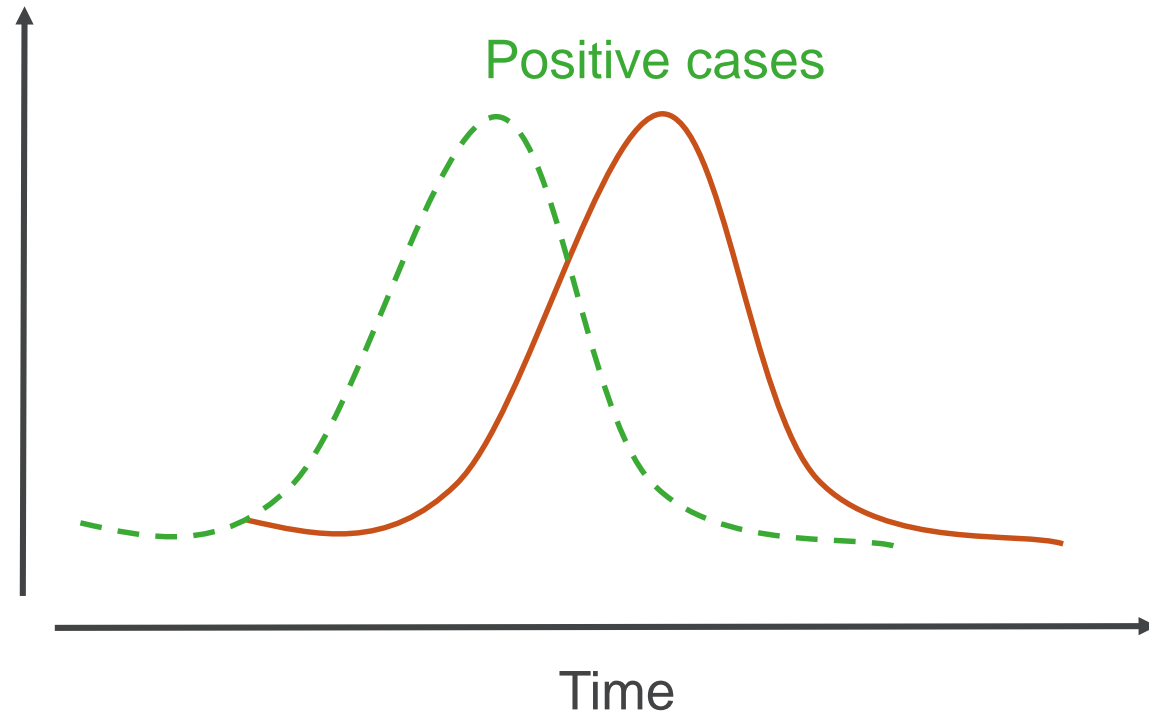

# How to alert hospitals ?

# Wastewater surveillance

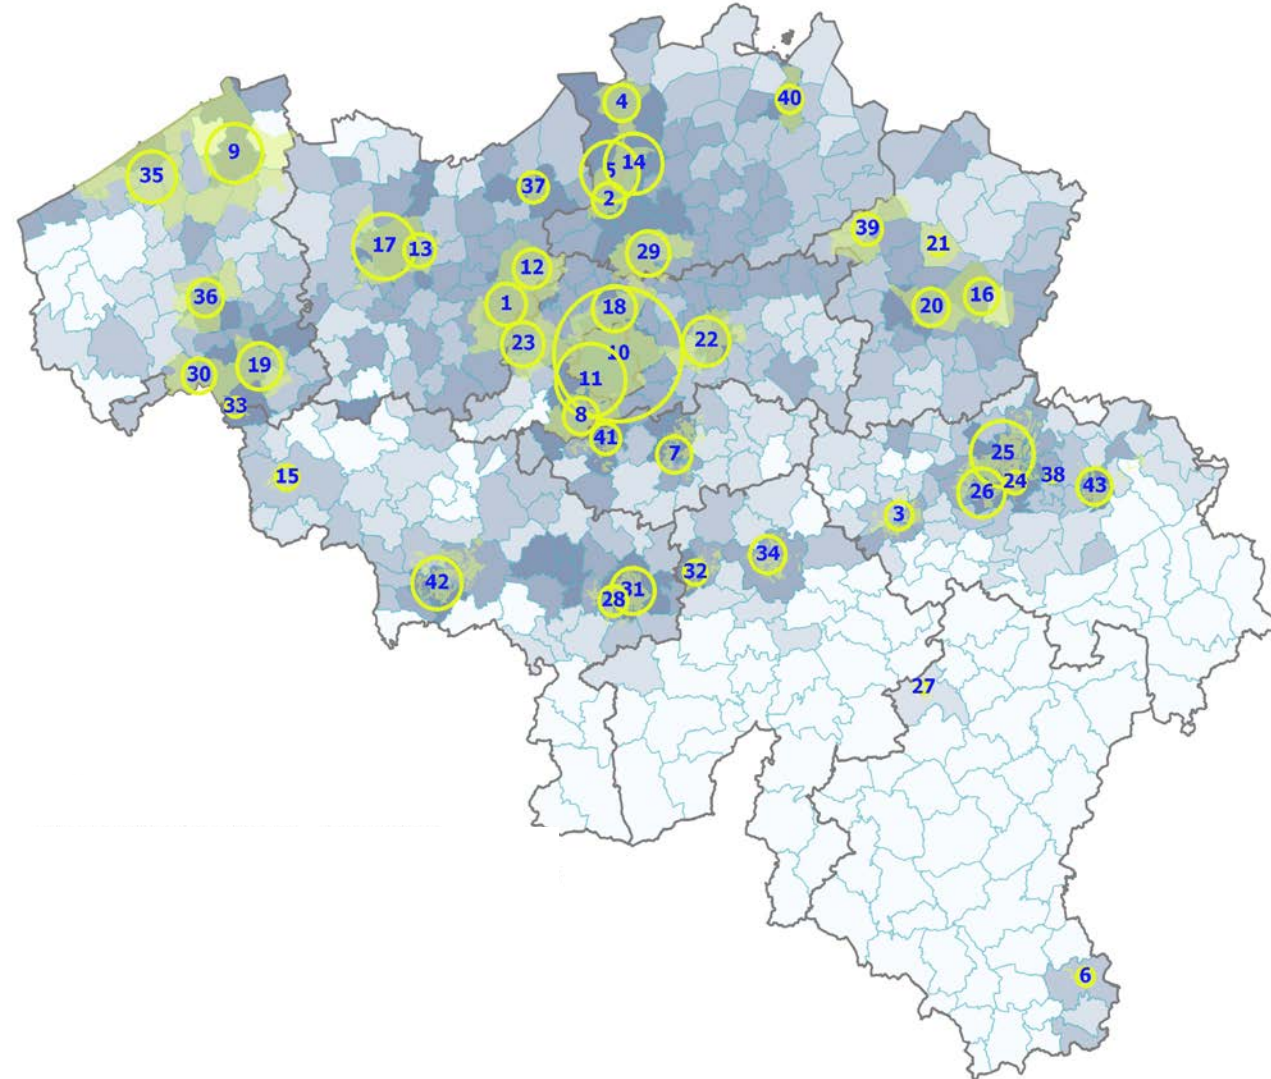

---

# Wastewater surveillance

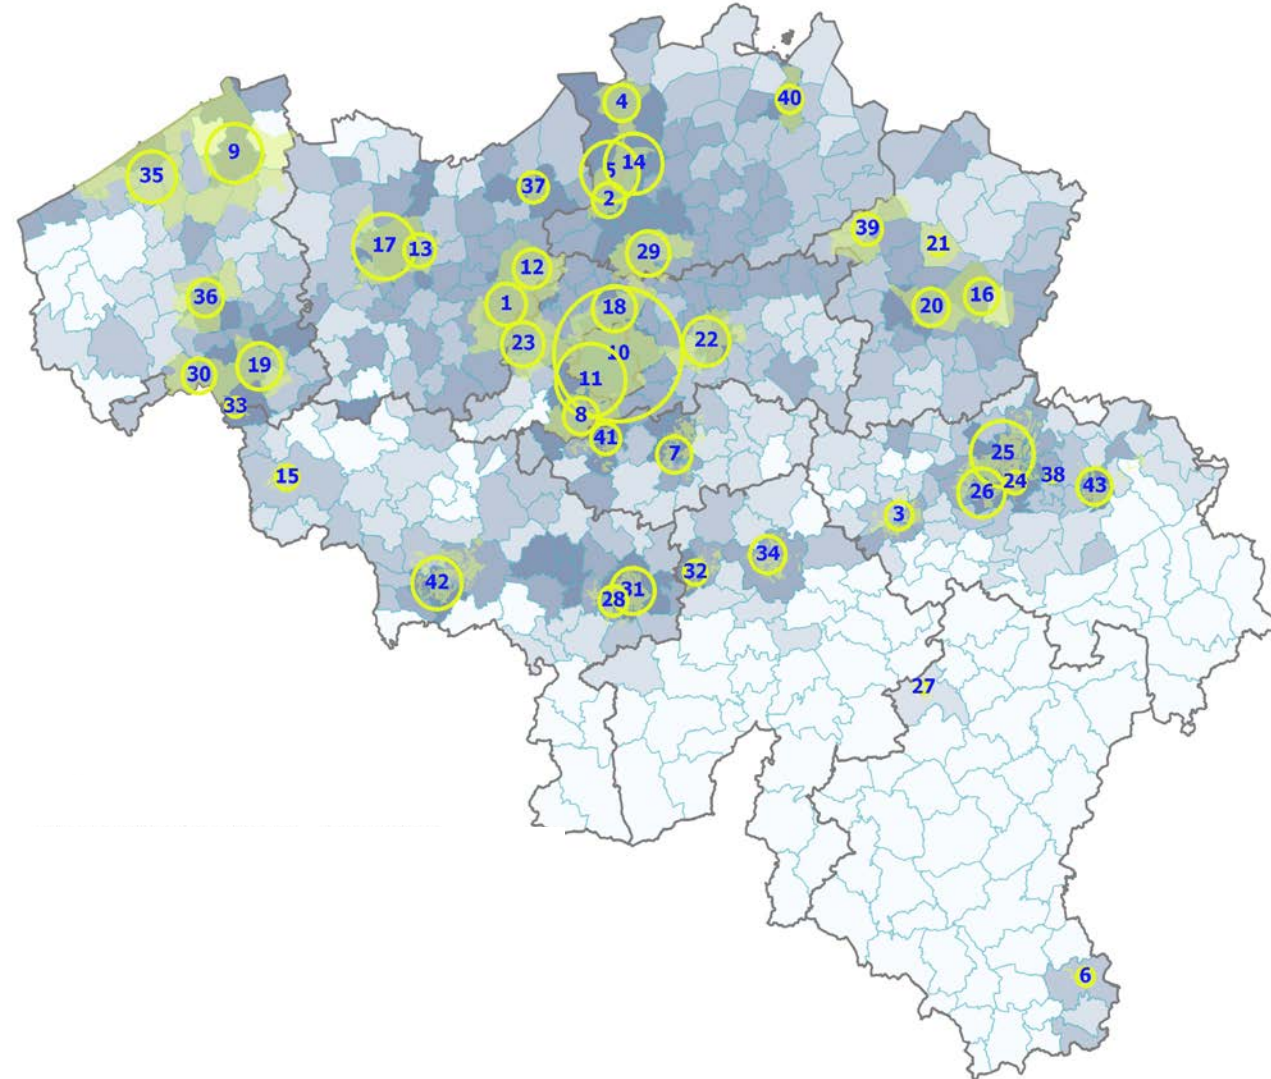

- 42 treatment plants in highly populated areas
- Covering  $\approx 40\%$  population

# Wastewater surveillance

- 42 treatment plants in highly populated areas
- Covering  $\approx 40\%$  population
- Started in September 2020
- Sampled twice per week
- More than 8 700 samples analyzed
- Cc. corrected for the dilution impact

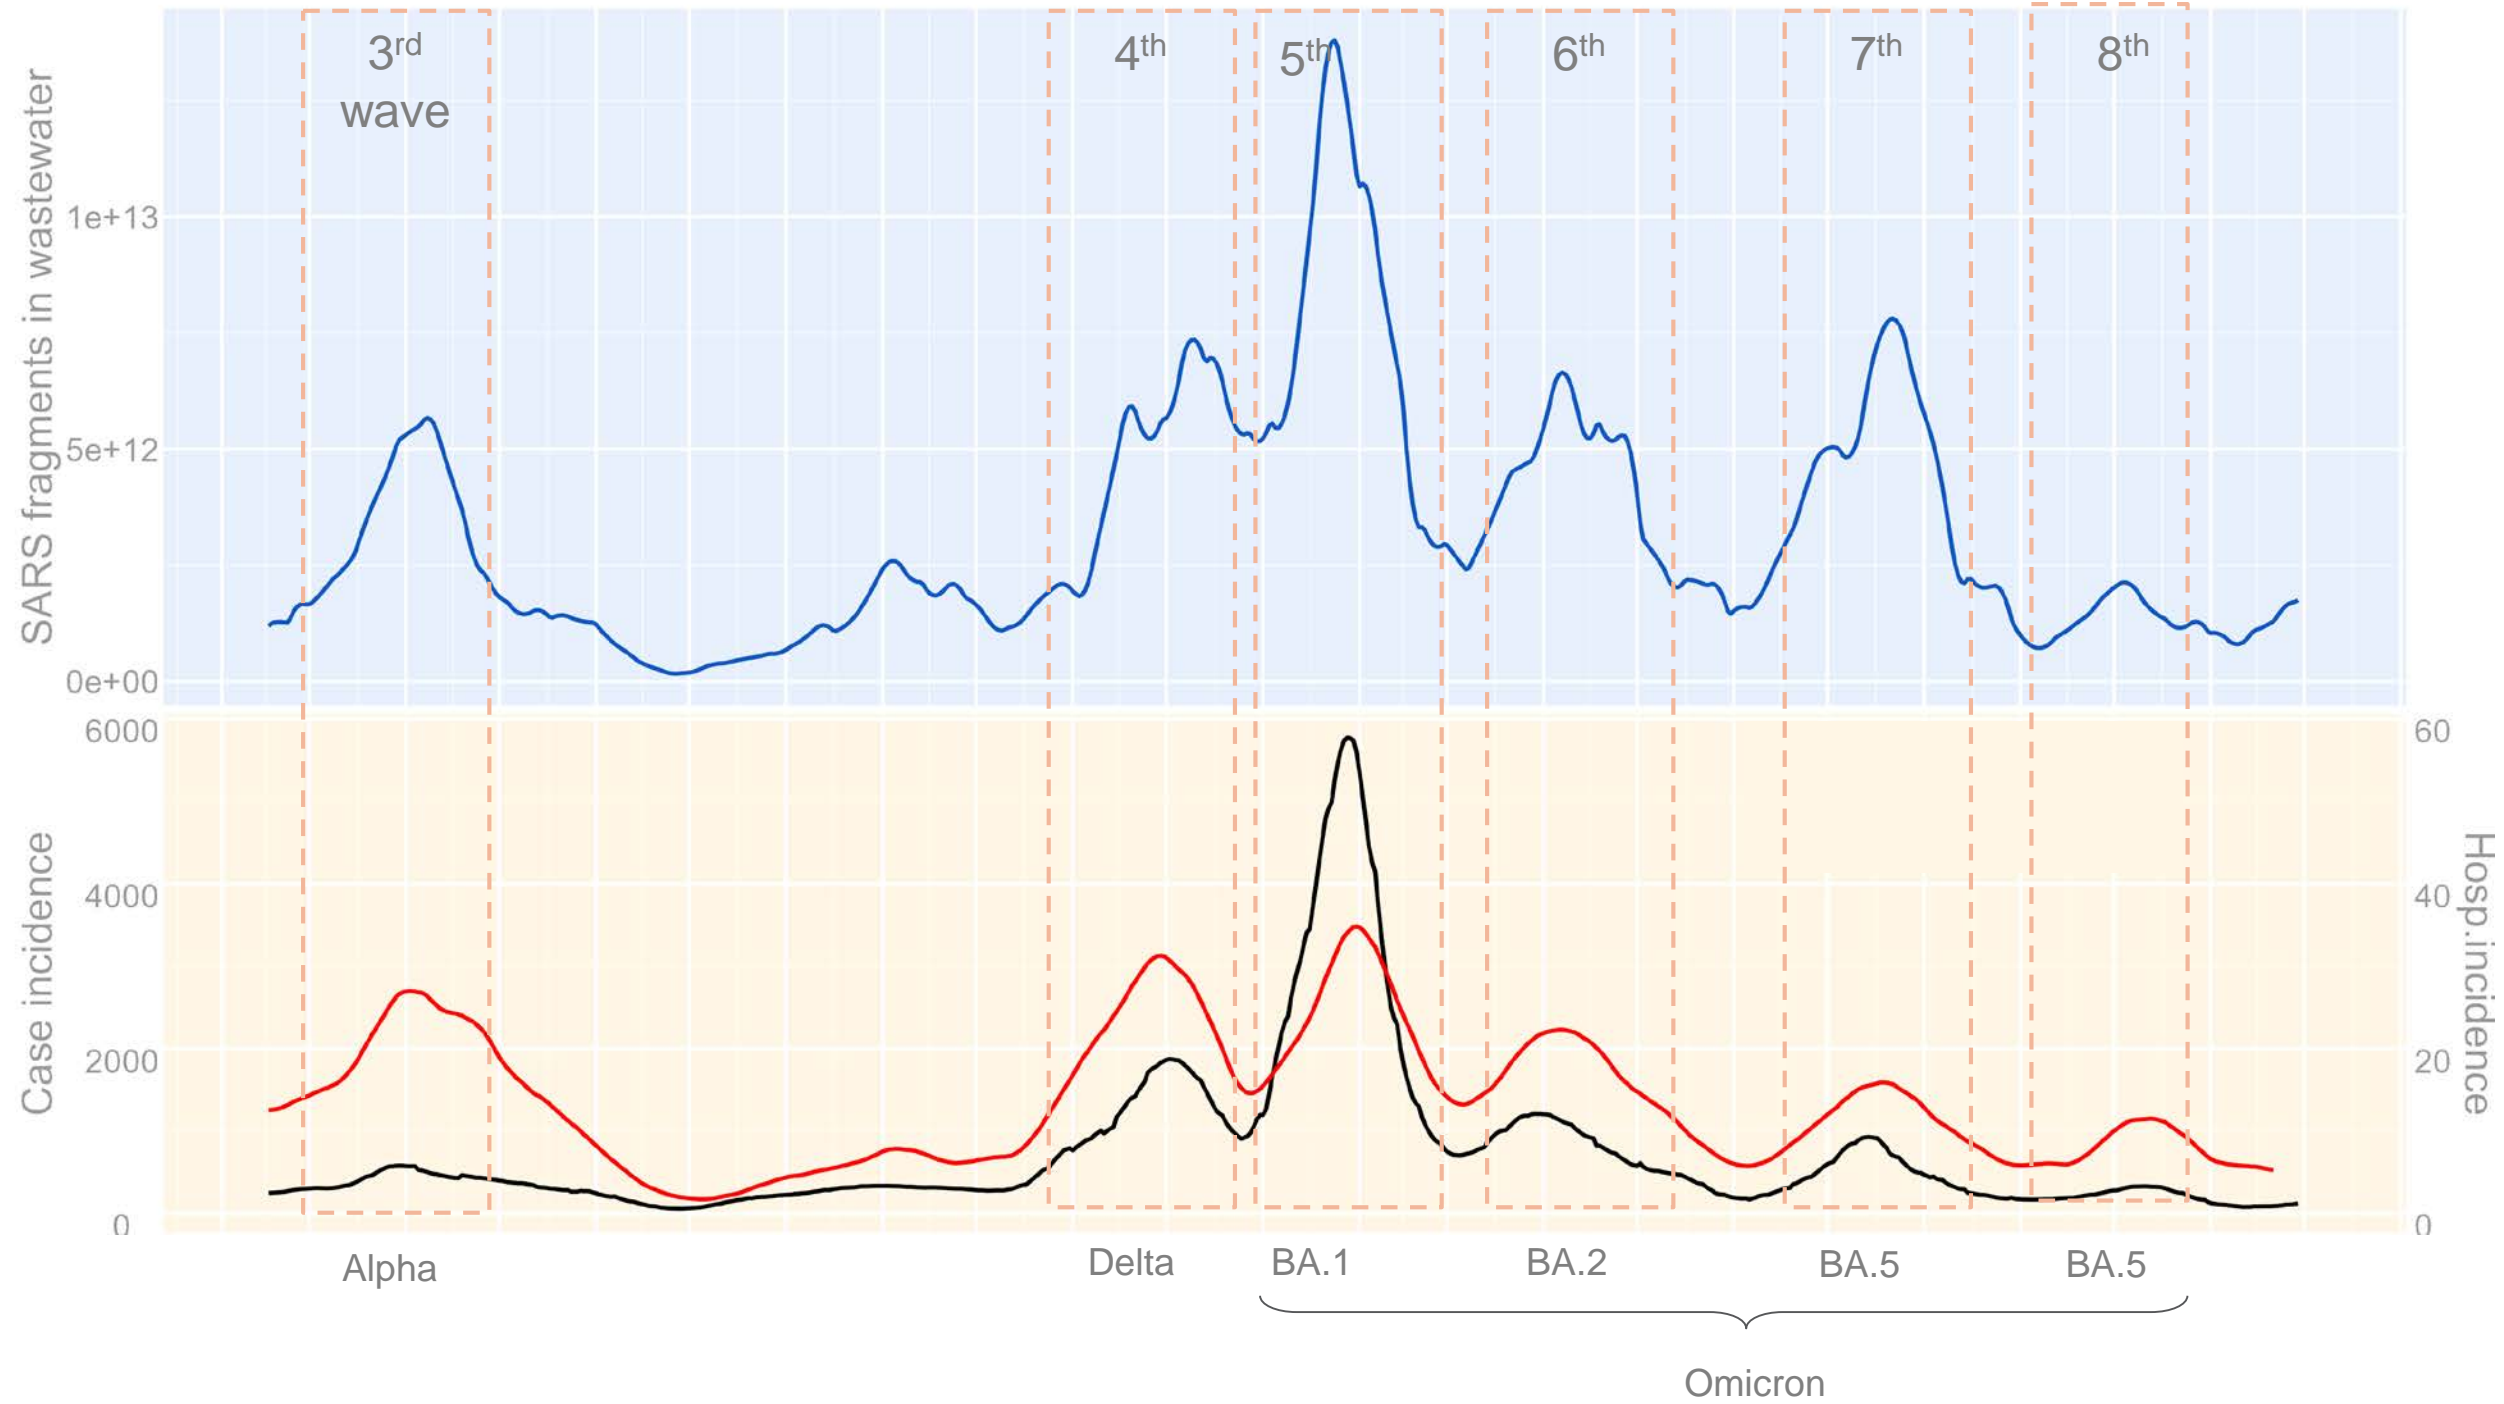

If you used a toilet while being infected by COVID-19,  
there is 40% chance you contributed

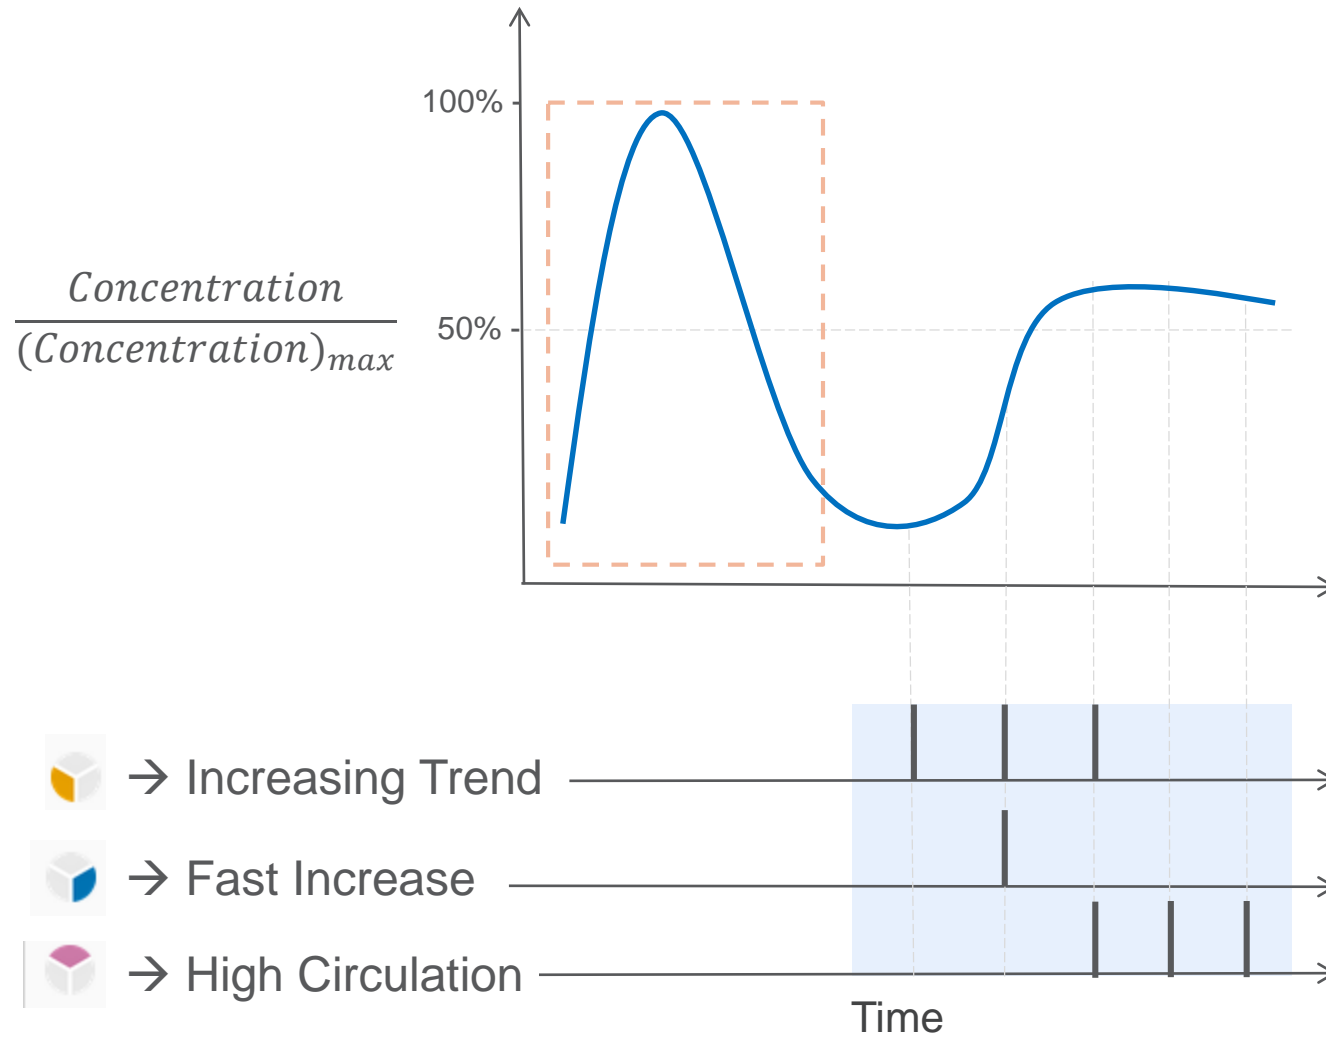

# Covid-19 surveillance

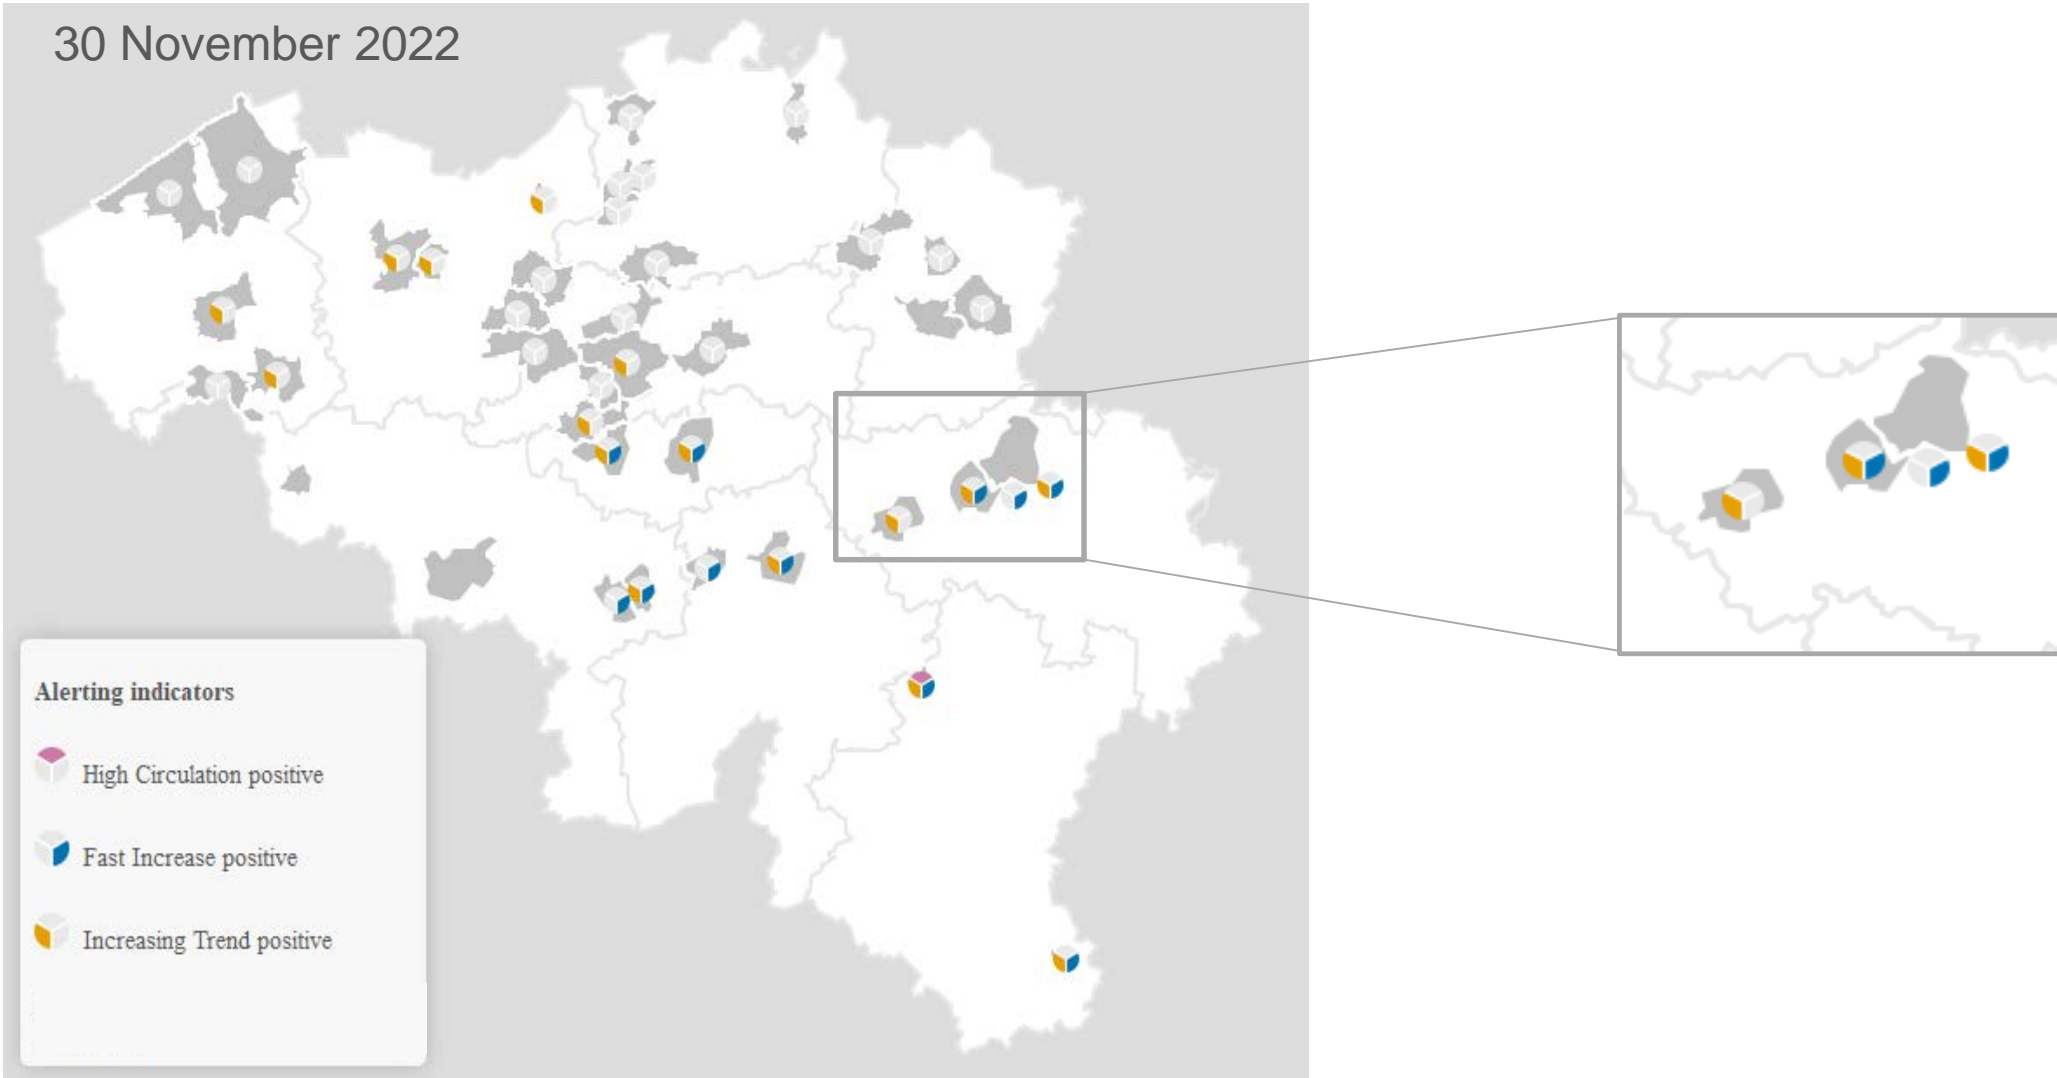

## - Wastewater indicators

# Covid-19 surveillance

## - Wastewater indicators

30 November 2022

# Covid-19 surveillance

## - Decision procedure of measures

---

### Existing surveillances

- General practitioner
- Case-based
- Nursing home
- Hospitalization
- Mortality
- Vaccination
- Wastewater

**Risk Assessment Group**

gives advice

**Risk Management Group**

takes the decision

## Achievements

- Cover a stable population
- Cover a large population
- Analytical method is stable
- Resurgences were detected
- Peaks were detected

## Challenges

- Contact tracing not possible
- Definition of alert levels
- Recent surveillance (R&D)

# We showed that wastewater-based epidemiology works for COVID-19

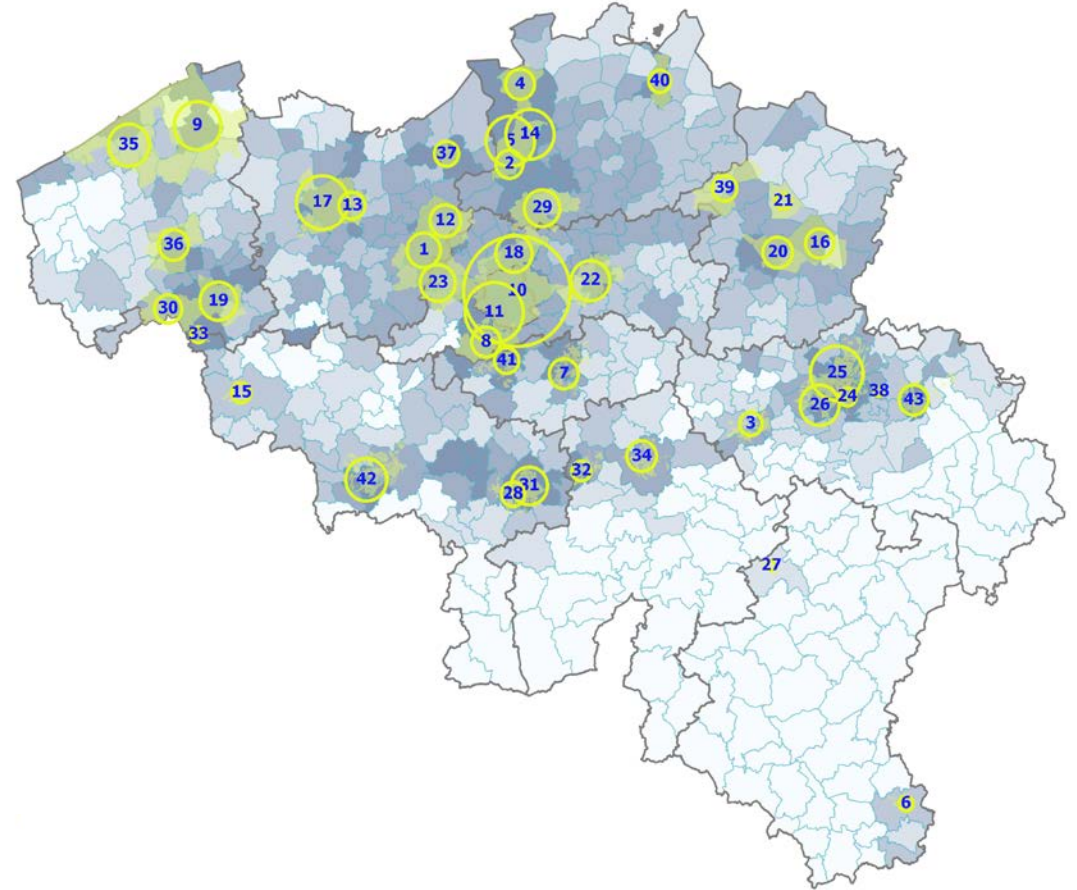

---

It can now be extended to

- Polio
- Antimicrobial resistance (AMR)

Also possible to

- Klebsiella bacteria
- Obesity markers

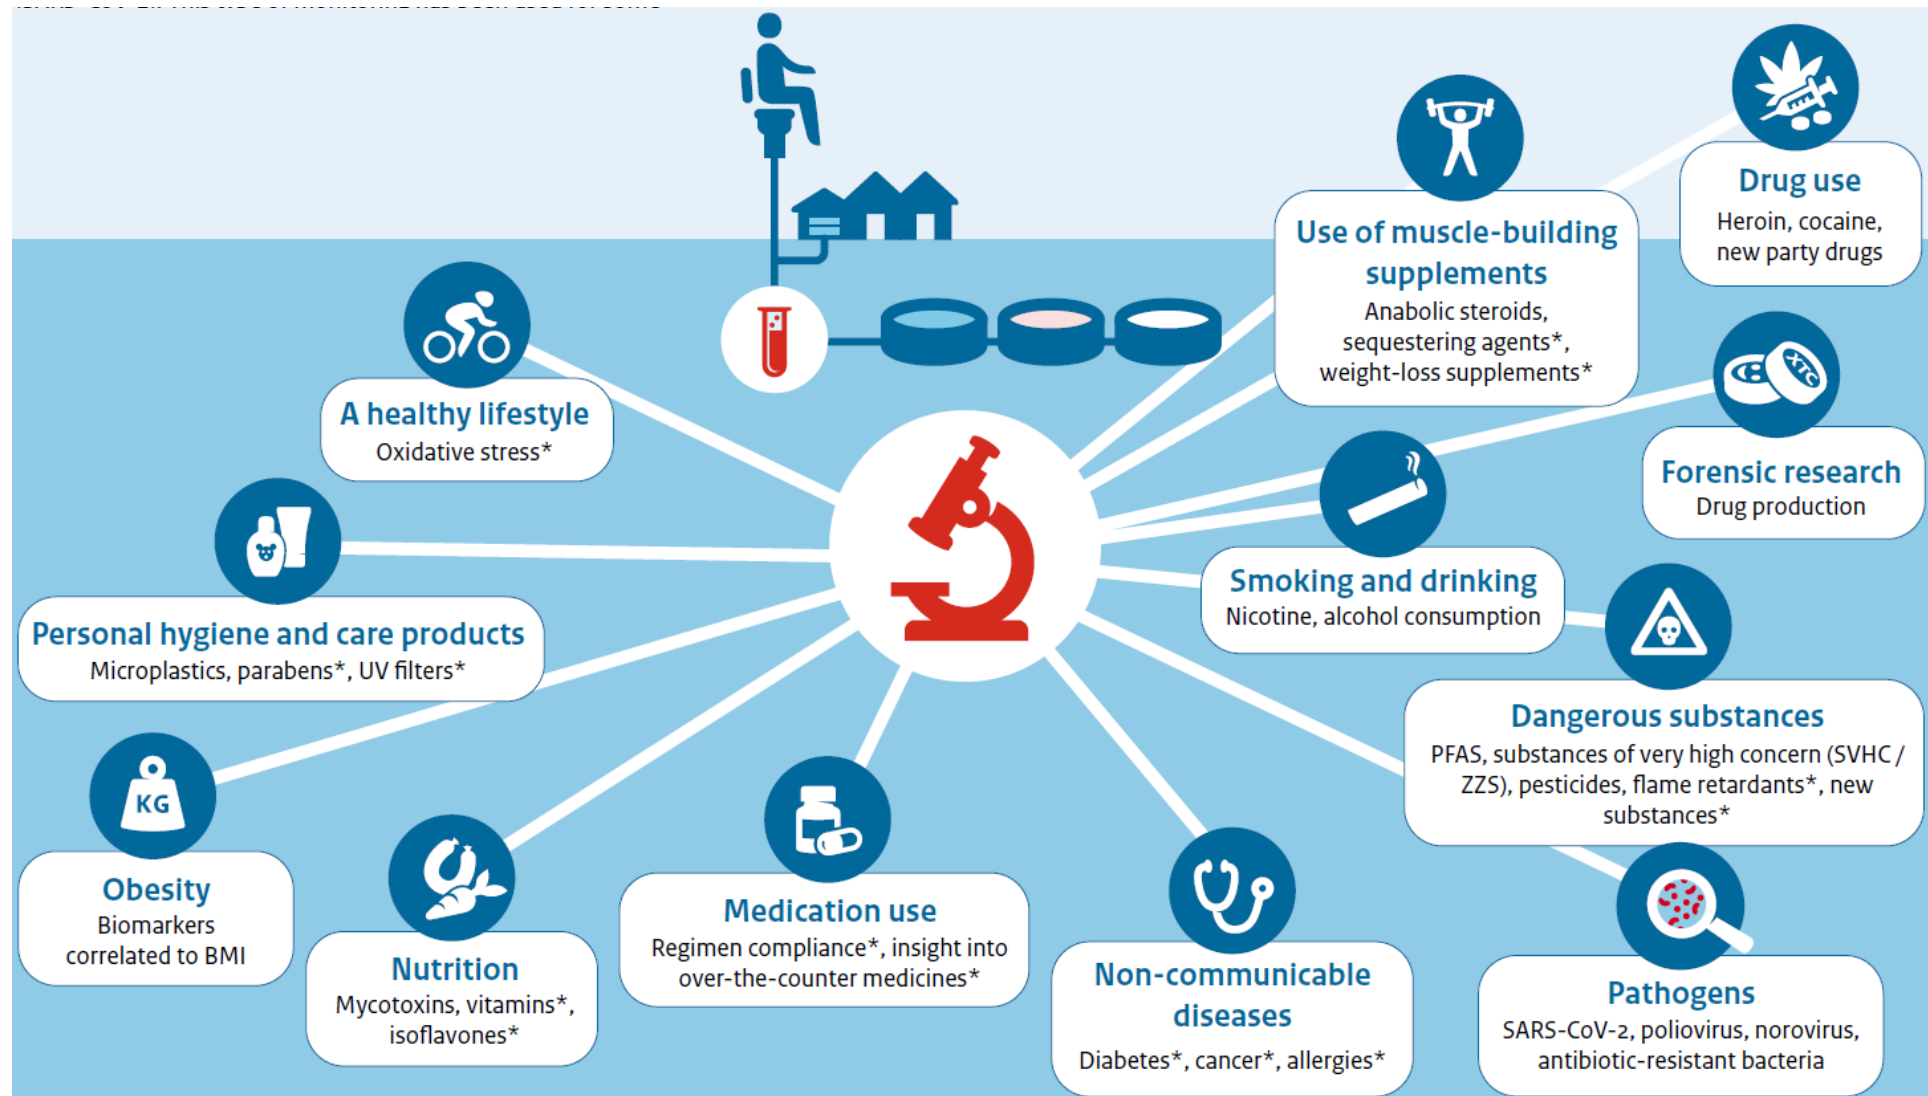

## Contact

**Author** – Raphael Janssens – [Raphael.Janssens@sciensano.be](mailto:Raphael.Janssens@sciensano.be)

**Project coordinator** - Marie Lesenfants - [Marie.Lesenfants@sciensano.be](mailto:Marie.Lesenfants@sciensano.be)

## Achievements

- Stable population covered
- Large population covered
- Stable analytical method
- Detection of resurgence
- Detection of waves

## Challenges

- Contact tracing not possible
- Definition of alert levels
- Recent surveillance (R&D)

## Future developments

- Impact study of mobility
- Extension to other public treats
