% of ultra-processed food products at the end caps front	26.4	2/5
% of ultra-processed food products at the check outs	88.0	4/5

ACCESS product accessibility **

	Results	Ranking
Average ratio of cumulative linear shelf length for healthy versus less healthy foods	0.25 (0.22-0.28)	5/5

*2023 **2022

Key recommendations to improve commitments on obesity and population level nutrition

Domain	Tertile	Key recommendations
STRAT – Corporate nutrition strategy	1	<ul style="list-style-type: none"> • Include SMART (specific, measurable, achievable, relevant and time bound) objectives and targets within nutrition strategy, • Incorporate Key Performance Indicators (KPIs) of management linked to nutrition strategy, policy, and targets, and provide a comprehensive table of these KPIs accessible through the company's website or reports, • Enhance comprehensiveness by encompassing multiple domains, including formulation, marketing, and labelling, within the strategic document, • Refer to national and global priorities (e.g. World Health Organization recommendations and Sustainable Development Goals) within the overarching nutrition strategy.
FORM – Product formulation	2	<ul style="list-style-type: none"> • Develop and publish SMART targets to reduce portion sizes across the product portfolio, • Commit to limit the addition of artificial trans-fats to products.
LABEL – Nutrition labelling	2	<ul style="list-style-type: none"> • Commit to providing on-pack information on added sugar and trans-fat content for all relevant own-brand products, • Publish a commitment to label products with nutrition and health claims only when products are healthy, according to an official nutrient profiling system, • Use shelf tags that provide the Nutri-Score for all food products in-store, • Initiate a nutrition and healthy eating education program in-store, such as having dietitians available and providing nutrition education materials.
PROMO – Product and brand promotion	1	<ul style="list-style-type: none"> • Make and publish commitments to reduce the exposure of children to unhealthy food marketing on own website, • Develop a marketing policy that applies to children up to the age of 18 years and that defines a target audience using children's peak viewing times, • Commit not to use celebrities, fantasy and animation characters and premium offers in marketing of unhealthy products to children, • Disclose policy regarding reducing children and adolescents' exposure to the marketing of unhealthy food and support WHO's position, • Commit on own website to reducing exposure to unhealthy food marketing for all consumers across non-broadcast and broadcast media, • Commit to limit the in-store promotion of unhealthy products, • Commit to limit the proportion of unhealthy (compared with healthy) foods promoted in regular catalogues, • Commit to linking rewards programs or loyalty programs with healthy food items, • Commit for in-store product presentations, product giveaways or tastings to be for healthy products only, • Audit/monitor compliance with commitments to limit marketing to all consumers at the national level by an independently appointed third party and publish the results, • Adopt an official nutrient profiling system (e.g. WHO Europe nutrient profile model) to classify products for the purpose of promotion to all consumers.
ACCESS – Product accessibility	1	<ul style="list-style-type: none"> • Commit to ensuring that standard prices of healthy products are lower than the standard prices of comparable unhealthy products, • Commit to a greater level of discount applying to healthy foods compared to unhealthy foods, • Commit to limit multi-buy specials on unhealthy foods, • Disclose policy position on making healthier foods relatively cheaper and unhealthy foods relatively more expensive and support WHO's position, • Implement a specific national-level policy aimed at augmenting the proportion of healthy products within the company's portfolio, • Commit to reduce the availability of unhealthy products and increase the availability of healthy products in settings, • Publicly commit to dedicate a minimum amount of shelf space/floor space to healthy products and a maximum to less healthy products, • Commit for checkouts to be free from unhealthy items, • Commit to limit the placement of unhealthy items at end of aisle displays or other high-traffic areas, • Adopt an official nutrient profiling system (i.e. Nutri-Score) to classify products for the purposes of product accessibility.

RELAT – Relationships with other organisations

1

- Publicly disclose professional organizations, scientific events, external research, nutrition education programs and active lifestyle programs funded or supported by the company at national-level, including awards/prizes, to clarify the nature of the support,
- Publicly disclose the company's involvement in public-private partnerships and/or joint ventures with government organisations/agencies,
- Publish information on political donations or statement of no activity within this area,
- Publicly disclose the company's support for industry associations, think tanks, interest groups, community organizations, or other lobbying organizations related to population nutrition, obesity, and NCD issues on its own website,
- Publicly disclose submissions to public consultations regarding relevant population nutrition policies.

OVERALL

1

Key recommendations to improve commitments on environmental sustainability

Domain	Tertile	Key recommendations
Corporate sustainability strategy	2	<ul style="list-style-type: none"> Identify and prioritize actions with significant environmental impact, using SMART objectives and publicly disclosing them, Publicly commit to screening suppliers based on environmental criteria.
