# Service Lifestyle and chronic diseases

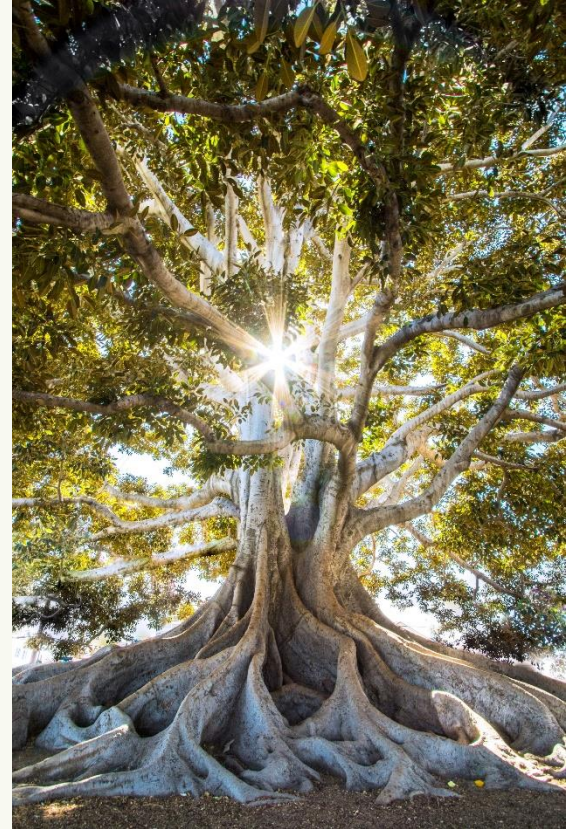

# Service Lifestyle and chronic diseases

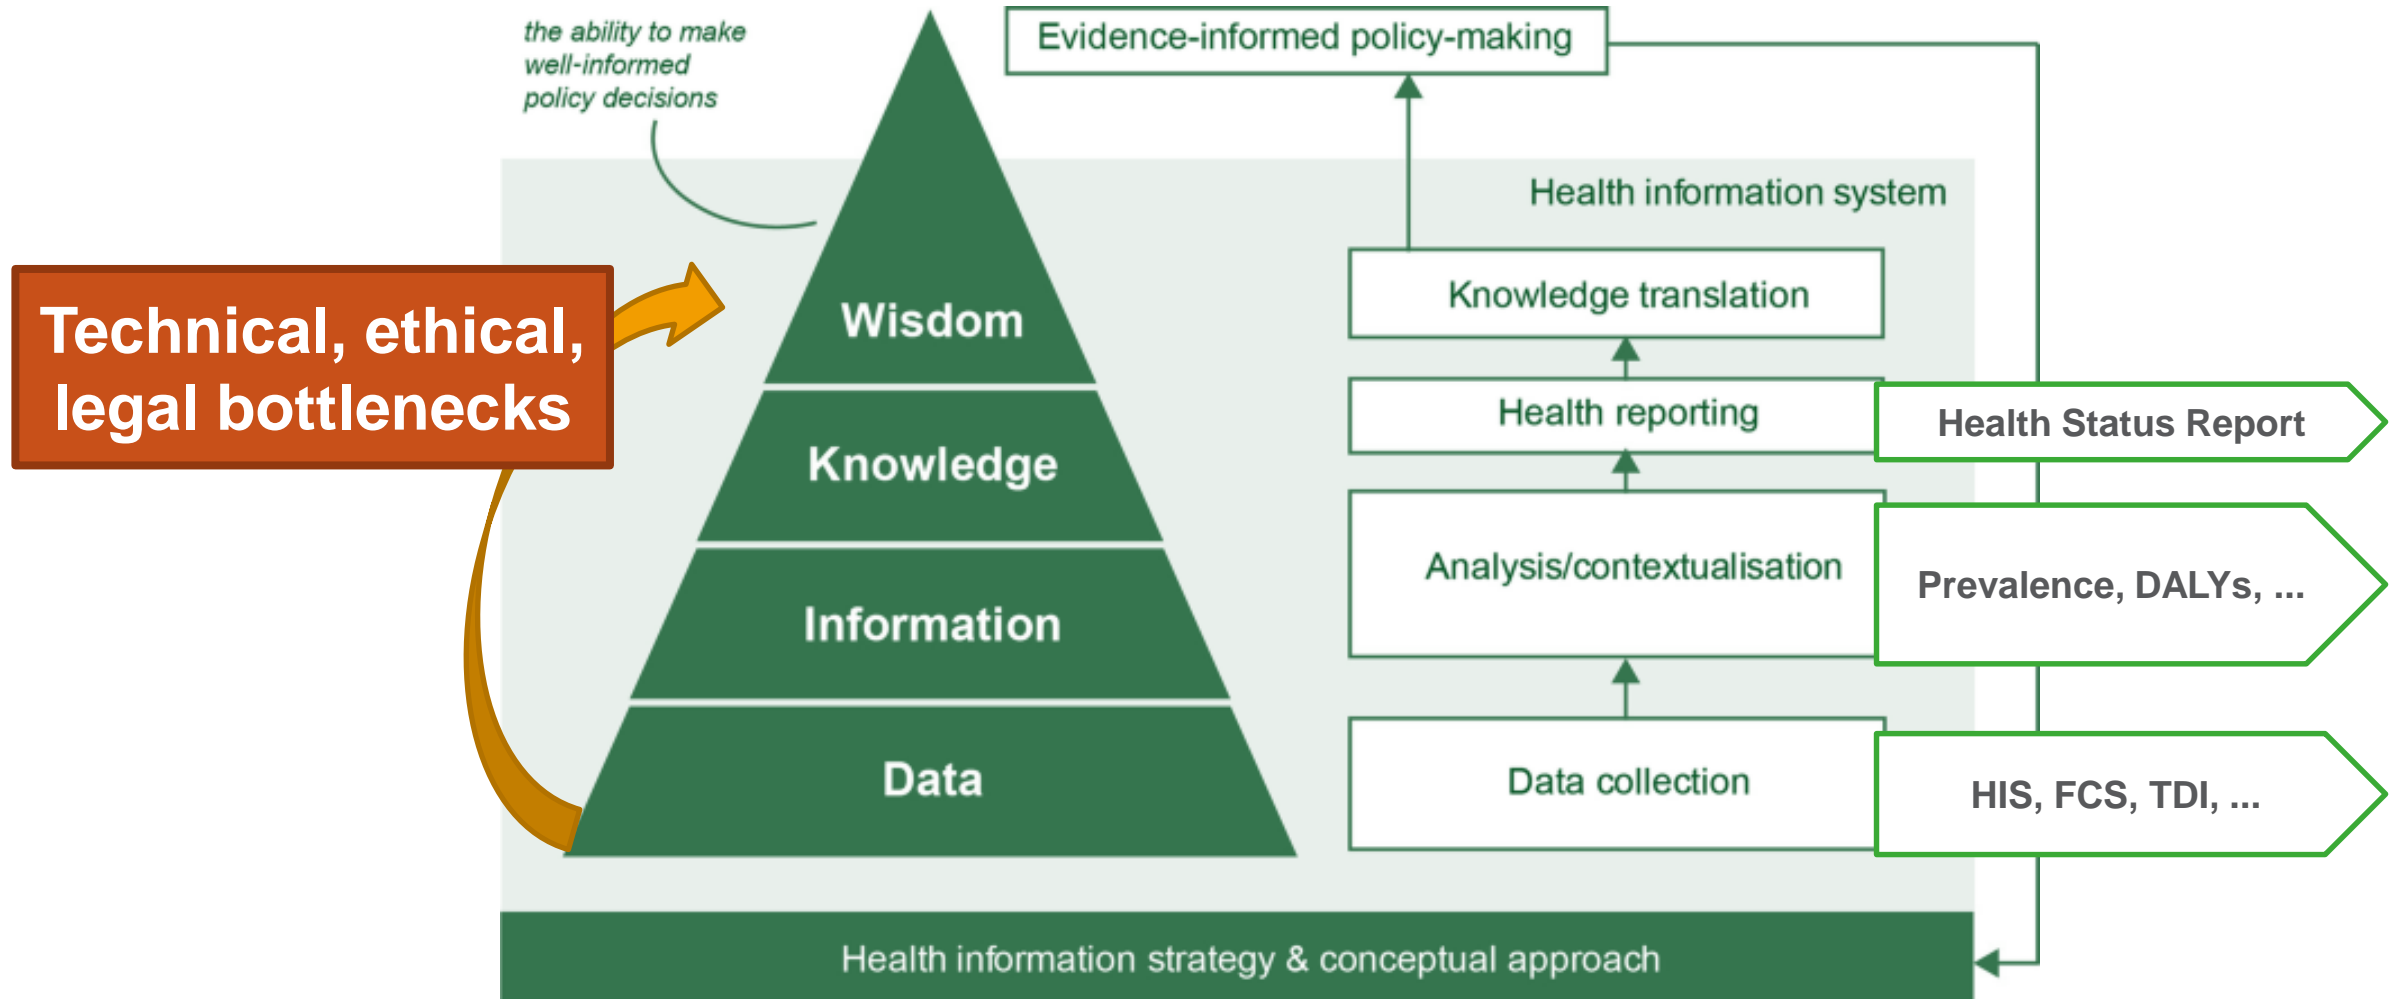

# LCD mission

1. We contribute to, valorize, and strengthen the Belgian and European **health information** system
2. We take a **broad view on public health**, focusing on the overall state of health and on chronic diseases and their determinants
3. We provide **pro-active policy support**, by putting current evidence into context and by evaluating health policy

# Climbing the health information pyramid

# AHEAD project

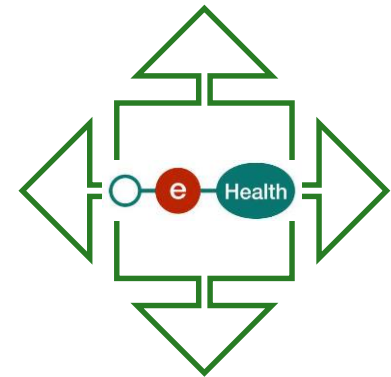

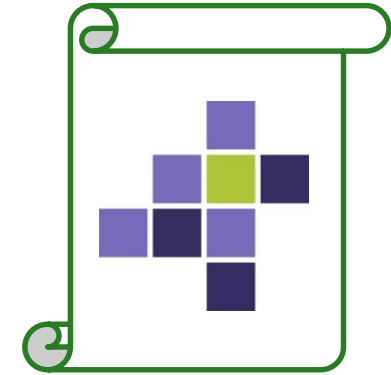

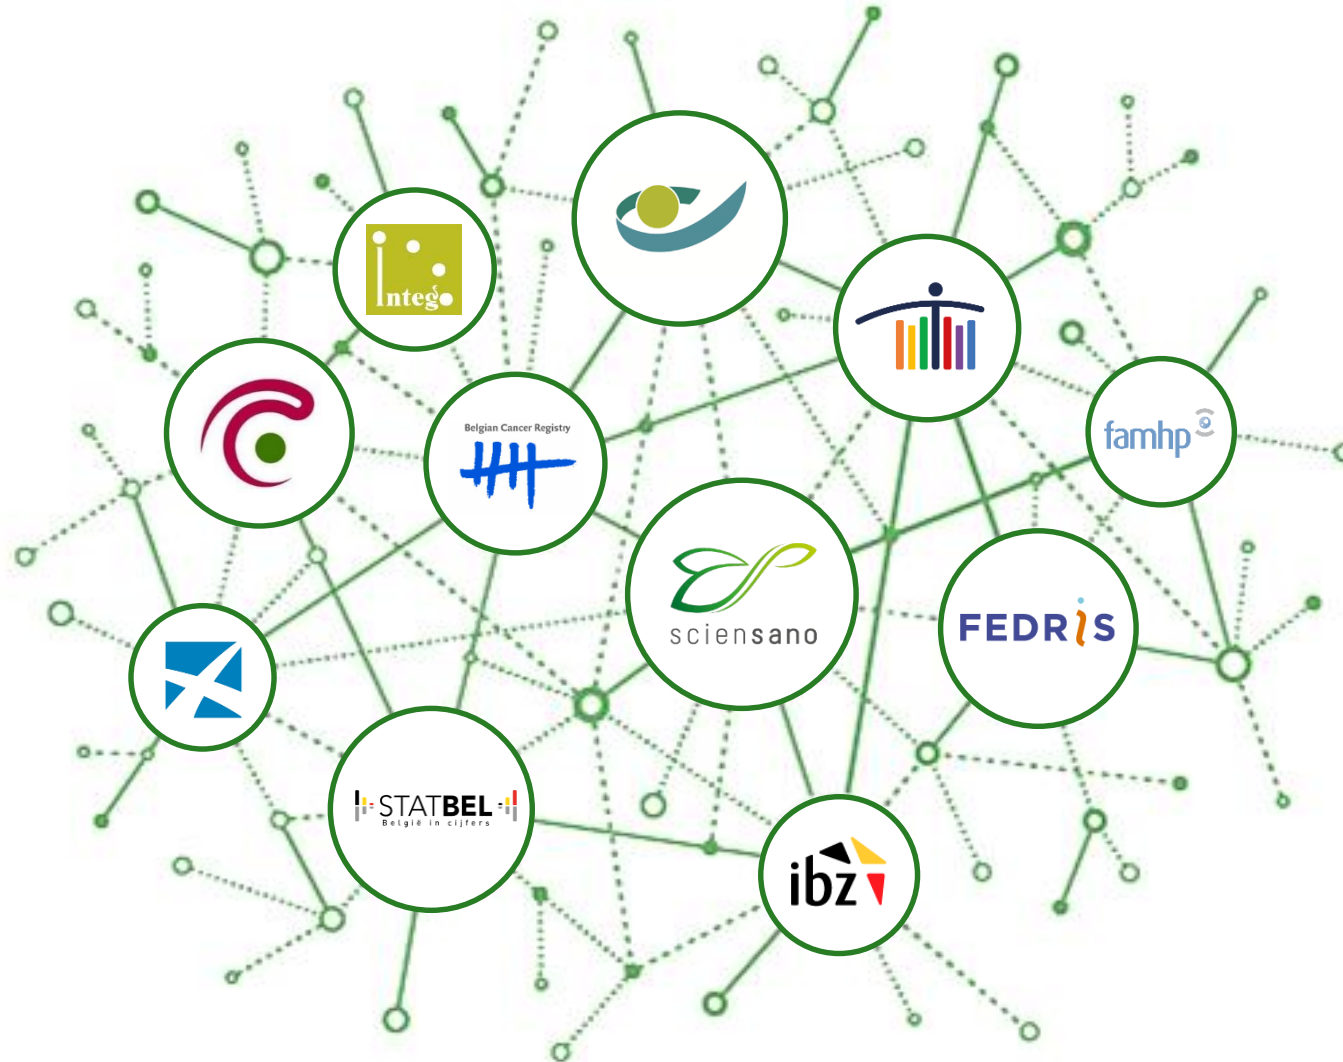

BRAIN-be 2.0 project – Belgian Research Action through Interdisciplinary Networks

AHEAD aims to provide an **active push** towards the development of a national health data platform

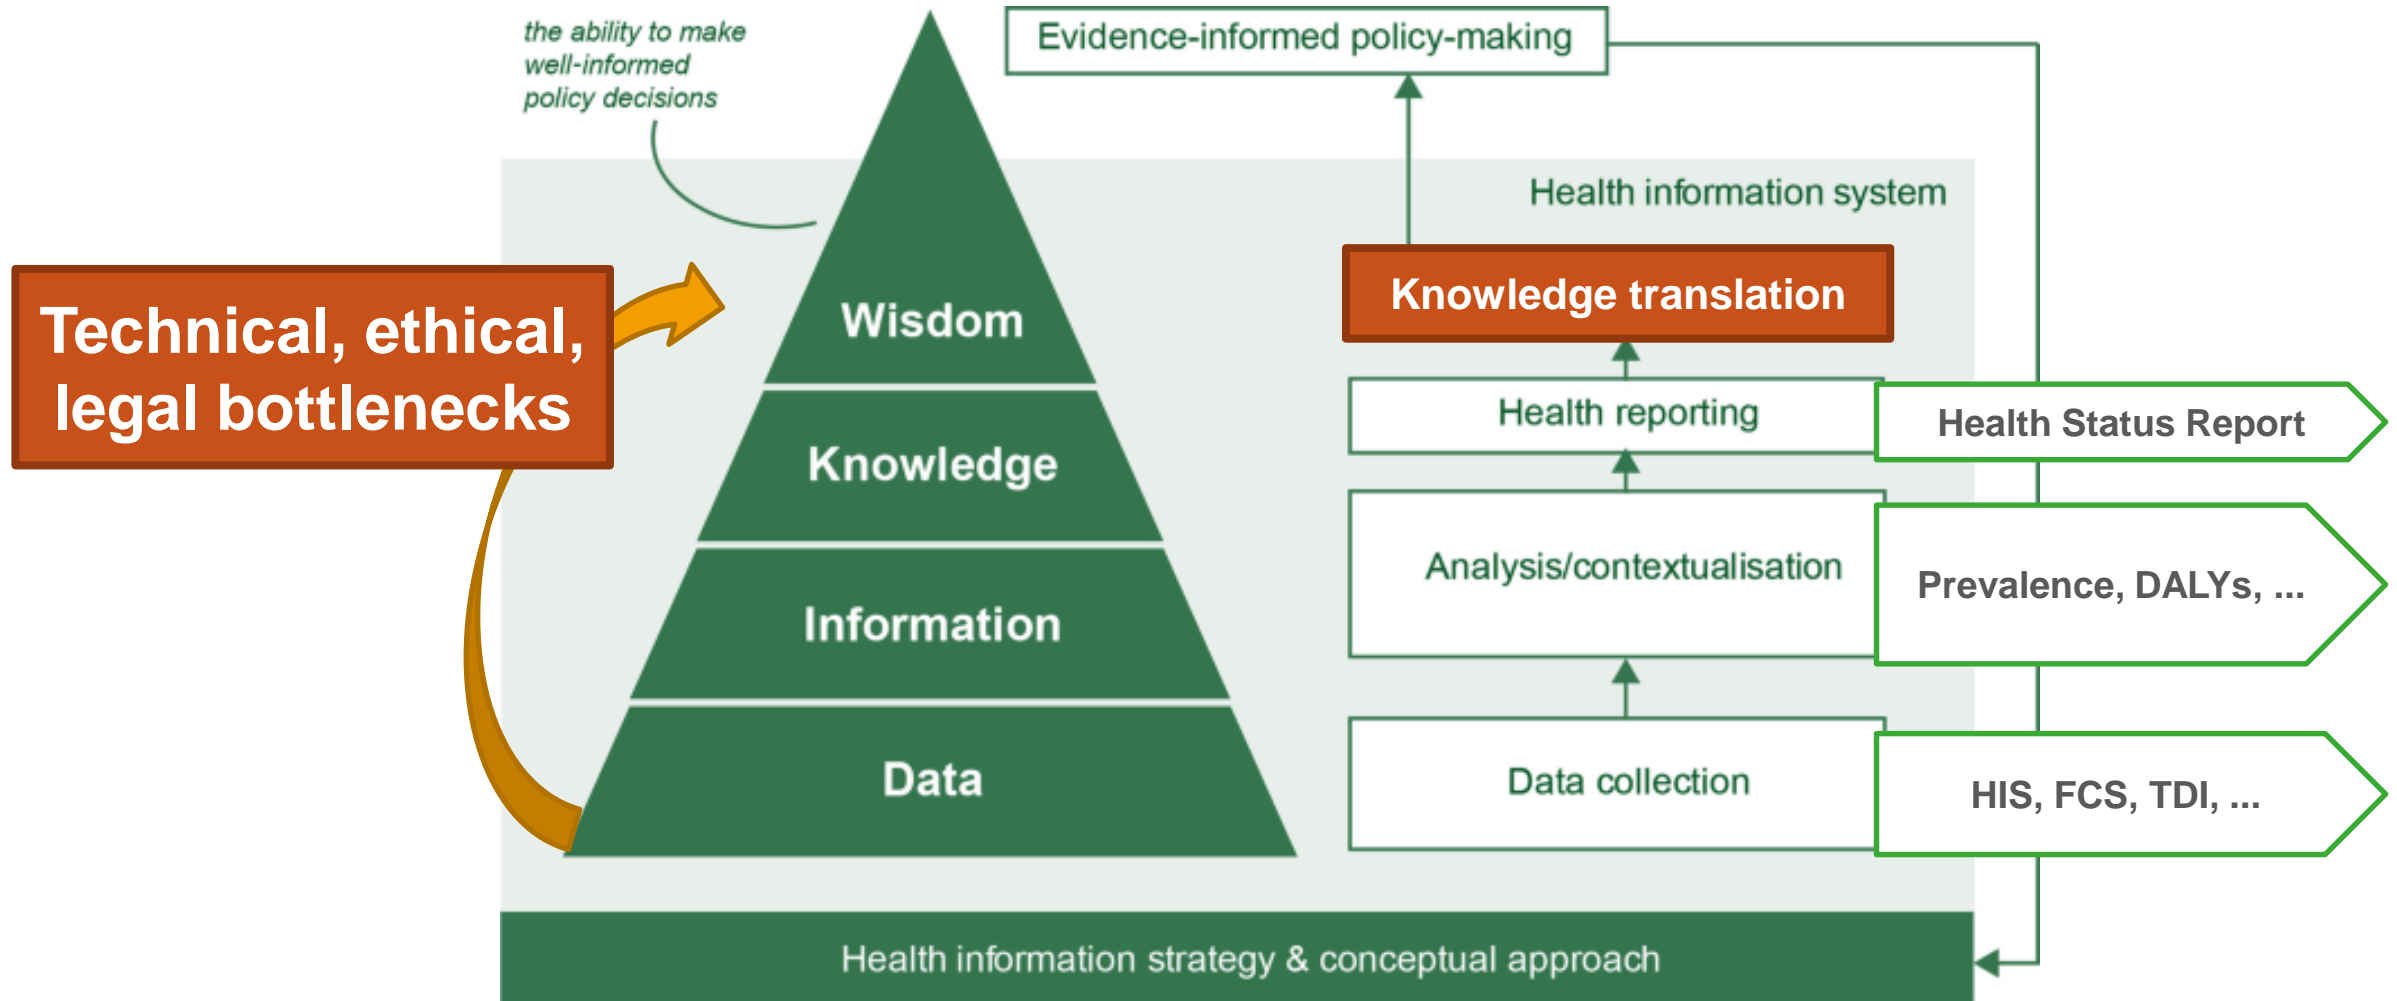

WP1	<b>Documenting and integrating</b> the currently scattered Belgian health information landscape
WP2	Unravelling legal, ethical and technical <b>bottlenecks</b> <ul style="list-style-type: none"><li>• Citizen e-consultation (TEHDaS)</li><li>• Business case BHIS+</li></ul>
WP3	Preparing <b>roadmaps</b> for longitudinal, accessible, harmonized national health data platform
